NEW QUESTION: 1

Which role must a user have to configure a portlet?

- A. Privileged user
- B. User
- C. Manager
- D. Editor

Answer: B

NEW QUESTION: 2

Which term below BEST describes the concept of least privilege?

- A. Each user is granted the lowest clearance required for their tasks.
- B. A formal separation of command, program, and interface functions.
- C. Active monitoring of facility entry access points.
- D. A combination of classification and categories that represents the sensitivity of information.

Answer: A

Explanation:

The least privilege principle requires that each subject in a system be granted the most restrictive set of privileges (or lowest clearance) needed for the performance of authorized tasks. The application of this principle limits the damage that can result from accident, error, or unauthorized use. Applying this principle may limit the damage resulting from accidents, errors, or unauthorized use of system resources. *Answer "A formal separation of command, program, and interface functions." describes separation of privilege, which is the separation of functions, namely between the commands, programs, and interfaces implementing those functions, such that malicious or erroneous code in one function is prevented from affecting the code or data of another function. *Answer "A combination of classification and categories that represents the sensitivity of information." is a security level. A security level is the combination of hierarchical classification and a set of non-hierarchical categories that represents the sensitivity of information. *Answer "Active monitoring of facility entry access points." is a distracter. Source: DoD 5200.28STD Department of Defense Trusted Computer System Evaluation Criteria.

NEW QUESTION: 3

Physical examination of a client regarding mobility status should:

- A. begin with the Tandem Walk test.
- B. begin with the Romberg test.
- C. be oriented to time, place, and person.
- D. begin with gait.

Answer: D

Explanation:

Explanation/Reference:

Explanation:

Gait is usually assessed as the client walks into the room. Normal gait is smooth, flowing, and rhythmic without assistive devices. Basic Care and Comfort

NEW QUESTION: 4

Which two statements about IPv6 access lists are true? (Choose two).

- A. IPv6 access lists support named access lists.
- B. IPv6 access lists support standard access lists.
- C. IPv6 access lists support numbered access lists.
- D. IPv6 access lists support wildcard masks.
- E. IPv6 access lists support extended access lists.

Answer: A,E

Explanation:

Here exists the first major difference we notice between IPv4 and IPv6 ACLs: IPv6 supports only extended ACLs. We cannot create a standard (source-only) IPv6 ACL. IPv6 also only supports named (versus numbered) ACLs.

```
Router(config)# ipv6 access-list ? WORD User selected string
identifying this access list log-update Control access list log
updates
```
