Answer: C

Explanation:

Here we have a very common catch in EXIN exams. In this matter, the personal data that was breached included the email addresses. Although the group is a subject considered sensitive by the GDPR, only other participants who had registered took notice. As it does not present a high risk to data subjects, there is no need to notify the data subject as well. Only the Supervisory Authority is enough. However, after notifying the Supervisory Authority, it may decide that the data subject should also be notified, but for that matter this is not considered. Article 33 of the GDPR legislates on the topic "Notification of a personal data breach to the supervisory authority". 1. In the case of a personal data breach, the controller shall without undue delay and, where feasible, not later than 72 hours after having become aware of it, notify the personal data breach to the supervisory authority competent in accordance with Article 55, unless the personal data breach is unlikely to result in a risk to the rights and freedoms of natural persons. Where the notification to the supervisory authority is not made within 72 hours, it shall be accompanied by reasons for the delay. Important The deadline for notification of data breaches to the Supervisory Authority is generally charged in the EXIN exam.

This period is 72 hours.
