Answer: C

NEW QUESTION: 2
Your customer has a SAM program. The customer installs SAM
tools that monitor approved software installations.
You need to monitor whether the customer adheres to approved
software installation policies.
What should you do?
A. Perform quarterly inventory verifications.
B. Perform quarterly license metering verifications.
C. Perform quarterly hardware inventory verifications.
D. Perform quarterly human resources audits for new employees.
Answer: B

NEW QUESTION: 3
Universal Containers (UC) notices that its application that
allows users to search for accounts makes a network request
each time a key is pressed. This results in too many requests
for the server to handle.
* Address this problem, UC decides to implement a debounce
function on string change handler.
What are three key steps to implement this debounce function?
Choose 3 answers:
A. Store the timeId of the setTimeout last enqueued by the
search string change handle.
B. If there is an existing setTimeout and the search string
changes, cancel the existing setTimeout using the persisted

timerId and replace it with a new setTimeout.
C. Ensure that the network request has the property debounce
set to true.
D. When the search string changes, enqueue the request within a
setTimeout.
E. If there is an existing setTimeout and the search string
change, allow the existing setTimeout to finish, and do not
enqueue a new setTimeout.
Answer: C,D,E

A. A

B. B

C. C

D. D

Answer: A
Explanation:
The Condition clause can be used to ensure users can only work
with resources if they are MFA authenticated.
Option B and C are wrong since the aws:MultiFactorAuthPresent
clause should be marked as true. Here you are saying that onl
if the user has been MFA activated, that means it is true, then
allow access.
Option D is invalid because the "boor clause is missing in the
evaluation for the condition clause.
Boolean conditions let you construct Condition elements that
restrict access based on comparing a key to "true" or "false."
Here in this scenario the boot attribute in the condition
element will return a value True for option A which will ensure
that access is allowed on S3 resources.
