Answer: B

NEW QUESTION: 2
Refer to the exhibit.

Assuming that the peer is configured correctly and the
interface is up, how many neighbors will be seen in the
EIGRPv6 neighbor table on this IPv6-only router?
A. none, because of the mismatch of timers
B. none, because EIGRPv6 only supports authenticated peers
C. one neighbor, which will use a local router-id of 6020. AB8.
. /64
D. none, because there is no EIGRP router ID configured
E. one neighbor, which will use a local router-id of 6010. AB8.
. /64
Answer: D
Explanation:
Configuring EIGRP for IPv6 has some restrictions; they are
listed below:
The interfaces can be directly configured with EIGRP for IPv6,
without the use of a global IPv6 address. There is no
network statement in EIGRP for IPv6.
The router ID needs to be configured for an EIGRPv6 protocol
instance before it can run.
EIGRP for IPv6 has a shutdown feature. Ensure that the routing
process is in "no shut" mode to start running the
protocol.
