NEW QUESTION: 1

Drag and drop the cryptographic algorithms for IPsec from the left onto the correct cryptographic processes on the right.

Answer:

Explanation:

Explanation

Reference:

https://www.cisco.com/c/en/us/td/docs/ios-xml/ios/sec_conn_vpni ps/configuration/xs-3s/sec-sec-for-vpns-w-ipse

NEW QUESTION: 2

Instructions

This item contains several questions that you must answer. You can view these questions by clicking on the corresponding button to the left. Changing questions can be accomplished by clicking the numbers to the left question. In order to complete the questions, you will need to refer to the topology.

To gain access to the topology, click on the topology button of the screen. When you have finished viewing the topology, you can return to your questions by clicking on the Questions button to the left.

Each of the windows can be minimized by clicking on the [-]. You can also reposition a window by dragging it by the title bar.

Scenario

Refer to the topology. The diagram represents a small network with a single connection to the Internet.

What must be configured on the network on order for users on the Internet to view web pages located on Web Server 2?

- A.** On Router R2, configure a default static route to the 192.168.1.0 network
- B.** On router R2, configure DNS to resolve the URL assigned to Web Server 2 to the 192.168.1.10 address.
- C.** On router R1, configure DHCP to assign a registered IP address on the 209.165.100.0/24 network to Web Server 2.
- D.** On router R1, configure NAT to translate an address on the 209.165.100.0/24 network to 192.168.1.10.

Answer: D

Explanation:

Explanation/Reference:

Explanation:

In order to allow internet users to access Web Server 2, we need to configure NAT address translation on router R1.

NEW QUESTION: 3

To which level the risk should be reduced to accomplish the objective of risk management?

A. To a level that an organization can accept

B. Explanation:

The main objective of risk management is to reduce risk to a level that the organization or company will accept, as the risk can never be completely eliminated.

C. To a level where ARO equals SLE

D. To a level that an organization can mitigate

E. To a level where ALE is lower than SLE

Answer: A

Explanation:

is incorrect. Risk mitigation involves identification, planning, and conduct of actions for reducing risk. Because the elimination of all risk is usually impractical or close to impossible, it is aimed at reducing risk to an acceptable level with minimal adverse impact on the organization's resources and mission. Answer: B and A are incorrect. There are no such concepts existing in manipulating risk level.
