The procedure to apply for this exam is very simple, C_TPLM30_67 Test Guide can guarantee that you can study these materials as soon as possible to avoid time waste.

NEW QUESTION: 1

Which three statements about the route preference of IS-IS are true? (Choose three.)

- A. An L2 path is preferred over an L1 path.
- B. Within each level, a path that supports optional metrics is preferred over a path that supports only the default metric.
- C. Both L1 and L2 routes will be installed in the routing table at the same time.
- D. An L1 path is preferred over an L2 path.
- E. The Cisco IS-IS implementation usually performs equal cost path load balancing on up to eight paths.
- F. Within each level of metric support, the path with the lowest metric is preferred.

Answer: B,D,F

Explanation:

Explanation/Reference:

Explanation:

Given multiple possible routes to a particular destination, an L1 path is preferred over an L2 path. Within each level, a path that supports the optional metrics is preferred over a path that supports only the default metric. (Again, Cisco supports only the default metric, so the second order of preference is not relevant to Cisco routers.) Within each level of metric support, the path with the lowest metric is preferred. If multiple equal-cost, equal-level paths are found by the Decision process, they are all entered into the route table. The Cisco IS-IS implementation usually performs equal-cost load balancing on up to six paths.
