NEW QUESTION: 1

Scenario:

CGE decided to virtualize its infrastructure workloads and provide a virtual solution to all end users. The infrastructure workloads include Delivery Controllers, StoreFront servers, License Servers, and Microsoft SQL Servers for databases. Which XenServer resource pool design should a Citrix Architect recommend to host all required workloads?

- A.** Create one dedicated resource pool for the infrastructure, Server OS machine, and Desktop OS machine workloads.
- B.** Create two resource pools: one for the infrastructure workloads and one for the Server OS machine and Desktop OS machine workloads.
- C.** Create three resource pools: one each for the infrastructure, the Server OS machine, and the Desktop OS machine workloads.
- D.** Create three dedicated resource pools: one for the Delivery

Controllers, one for virtual Server OS machine and Desktop OS machine workloads, and one for infrastructure workloads.

Answer: C
