NEW QUESTION: 1

Which function is not supported by a backup management node?
A. To maintain and manage user permissions and software
licenses
B. To manage all records of jobs and historical task records
C. To provide web and GUI services
D. To maintain index information of backup media
E. To maintain configuration information about all components
(including clients, media agents, and backup devices)
Answer: D

NEW QUESTION: 2
What is the primary disadvantage of using return on investment
(ROI) rather than residual income (RI) to
evaluate the performance of investment center managers?
A. ROI does not necessarily reflect the company's cost of
capital.
B. ROI does not reflect all economic gains.
C. ROI may lead to rejecting projects that yield positive cash
flows.
D. ROI is a percentage, while RI is a dollar amount.
Answer: C
Explanation:
Choice "b" is correct. The primary disadvantage of using return
on investment (ROI) rather than residual
income (RI) to evaluate the performance of investment center
managers is that ROI may lead to rejecting
projects that yield positive cash flows. Profitable investment
center managers might be reluctant to invest
in projects that might lower their ROI (especially if their
bonuses are based only on their investment
center's ROI), even though those projects might generate
positive cash flows for the company as a whole.
This characteristic is often known as the "disincentive to
invest."
Choice "a" is incorrect. The primary disadvantage of using
return on investment (ROI) rather than residual
income (RI) to evaluate the performance of investment center
managers is that ROI may lead to rejecting
projects that yield positive cash flows, not that ROI is a
percentage and RI is a dollar amount. The fact that
one is a percentage and one is a dollar amount might make them
a little harder to interpret, but this
interpretation difficulty would certainly not seem to be the
"primary" disadvantage.
Choice "c" is incorrect. The primary disadvantage of using
return on investment (ROI) rather than residual
income (RI) to evaluate the performance of investment center
managers is that ROI may lead to rejecting
projects that yield positive cash flows, not that ROI does not
necessarily reflect the cost of capital.
Choice "d" is incorrect. The primary disadvantage of using

return on investment (ROI) rather than residual income (RI) to evaluate the performance of investment center managers is that ROI may lead to rejecting projects that yield positive cash flows, not that ROI does not reflect all economic gains.

NEW QUESTION: 3
Click the Exhibit button.

You are troubleshooting an IS-IS adjacency problem as shown in the exhibit.
Which action would solve the problem?
A. Configure matching area IDs.
B. Configure the ISO family for the loopback interface.
C. Configure matching authentication keys.
D. Configure the INET6 family for the loopback interface.
Answer: A
