NEW QUESTION: 1
Your team Is excited about the use of AWS because now they have access to "programmable Infrastructure" You have been asked to manage your AWS infrastructure in a manner similar to the way you might manage application code You want to be able to deploy exact copies of different versions of your infrastructure, stage changes into different environments, revert back to previous versions, and identify what versions are running at any particular time (development test QA. production).
Which approach addresses this requirement?
A. Use AWS CloudFormation and a version control system like GIT to deploy and manage your infrastructure.
B. Use cost allocation reports and AWS OpsWorks to deploy and manage your infrastructure.
C. Use AWS CloudWatch metrics and alerts along with resource

tagging to deploy and manage your infrastructure.
D. Use AWS Beanstalk and a version control system like GIT to deploy and manage your infrastructurë.
Answer: A
Explanation:
Explanation
OpsWorks for Chef Automate automatically performs updates for new Chef minor versions.
OpsWorks for Chef Automate does not perform major platform version updates automatically (for example, a major new platform version such as Chef Automate 13) because these updates might include backward-incompatible changes and require additional testing. In these cases, you must manually initiate the update.

NEW QUESTION: 2
Select two ways in which technical debt impacts transparency. (Choose two.)
A. It enhances transparency for the Product Owner as a Development Team is not allowed to do additional feature development in a Sprint as long as there is technical debt.
B. As development progresses and code is added, the system becomes more difficult to stabilize, which results in future work being slowed down in unpredictable ways.
C. When calculated and estimated, the totalamount of technical debt shows exactly how long until the Product Owner can release the Increment.
D. It leads to false assumptions about the current state of the system, specifically of an Increment being releasable at the end of a Sprint.
Answer: B,D

NEW QUESTION: 3
Ihr Netzwerk enthält eine Active Directory-Domäne mit dem Namen contoso.com.
Die Funktionsebene der Gesamtstruktur und der Domäne ist Windows Server 2008 R2.
