Answer: C,D

NEW QUESTION: 2

You manage a solution in Azure.

You must collect usage data including MAC addresses from all devices on the network.

You need to recommend a monitoring solution.

What should you recommend?

- A. Azure Wire Data
- B. Activity log Analytics

- C. Azure Network Security Group Analytics
- D. Network Performance Monitor
- E. Azure Application Gateway Analytics

Answer: A

Explanation:

Explanation: Wire data is consolidated network and performance data collected from Windows-connected and Linux-connected computers with the OMS agent, including those monitored by Operations Manager in your environment. Network data is combined with your other log data to help you correlate data. When you search using wire data, you can filter and group data to view information about the top agents and top protocols. Or you can view when certain computers (IP addresses/MAC addresses) communicated with each other, for how long, and how much data was sent-basically, you view metadata about network traffic, which is search-based
