#### **NEW QUESTION: 1**

Mutual funds are distributed by

- A.** three major methods: through brokers, through dedicated sales forces, or through direct purchase from the fund or direct marketing. Most no-load funds have been distributed through brokers, while most load funds have been distributed through direct marketing.
- B.** two major methods: through a sales forces, or through direct purchase from the fund or direct marketing. Although most funds are currently distributed through direct marketing, there has recently been a trend toward distribution through a sales force.
- C.** two major methods: through a sales forces, or through direct

purchase from the fund or direct marketing. Although most funds are currently distributed through a sales force, there has recently been a trend toward distribution through direct marketing.

**D.** three major methods: through brokers, through dedicated sales forces, or through direct purchase from the fund or direct marketing. Most no-load funds have been distributed through a sales force, while most load funds have been distributed through brokers.

**Answer: C**

Explanation:

Explanation/Reference:

Explanation:

In the past, no-load funds were sold only through direct marketing because the lack of a sales fee made it difficult to compensate brokers or a dedicated sales force. More recently, some brokers have started distributing no-load funds. Currently, about 54% of funds are distributed through a sales force, while 34% are distributed through direct marketing.

#### **NEW QUESTION: 2**

What is the difference between Flows and Event data collected by IBM Security QRadar SIEM V7.2.8?

**A.** An Event can span time lasting seconds, minutes, hours depending on the duration of a network session.

A Flow happens at a single point in time and then is complete.

**B.** Events are streamed each minute to the Event Processor.

Flows are streamed immediately to the Flow Processor.

**C.** Flow data is collected from different log sources. Event data is collected from internal or external network sources.

**D.** An Event occurs at a specific time and is logged at that time. A Flow is a record of network activity that can last for seconds, minutes, hours, or days.

**Answer: D**

Explanation:

Explanation

#### **NEW QUESTION: 3**

A customer wants to see how the HPE DL380 Gen10 servers have been placed in the rack you just configured in OCA Click on the exhibit where you would enable this feature in OCA.

**Answer:**

Explanation:
