NEW QUESTION: 3

You have a project management application. The application uses a Microsoft SQL Server database to store data. You are developing a software bug tracking add-on for the application. The add-on must meet the following requirements:

- * Allow case sensitive searches for product.
- * Filter search results based on exact text in the description.
- * Support multibyte Unicode characters.

You run the following Transact-SQL statement:

You need to display a comma separated list of all product bugs filed by a user named User1.

How should you complete the Transact-SQL statement? To answer, drag the appropriate Transact-SQL segments to the correct locations. Each Transact-SQL segment may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
