NEW QUESTION: 1

Note: In this section, you'll see one or more sets of questions with the same scenario and problem.

Each question presents a unique solution to the problem, and you must determine whether the solution meets the stated goals. Any of the solutions might solve the problem. It is also possible that none of the solutions solve the problem.

Once you answer a question in this section, you will NOT be

able to return to it. As a result, these questions will not appear in the review screen.

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals.

Your network contains an Active Directory domain named contoso.com. The domain contains a DNS server named Server1. All client computers run Windows 10. On Server1, you have the following zone configuration:

You need to prevent Server1 from resolving queries from DNS clients located on Subnet4. Server1 must resolve queries from all other DNS clients.

Solution: From Windows PowerShell on Server1, you run the Add-DnsServerTrustAnchor cmdlet.

Does this meet the goal?

A. No

B. Yes

Answer: A

Explanation:

Explanation/Reference:

Explanation:

NEW QUESTION: 2

Match each key functions of service operation management with its objective.

Answer:

Explanation:

Explanation

Service Assets and configuration management - Maintain information on components and their relationships that needs to be managed to deliver services.

Incident Management - Restore cloud services to normal operational state as quickly as possible when unplanned events cause an interruption or downgrade to service quality
Problem Management - Prevent incidents that share common symptoms and root causes from reoccurring, and minimize adverse impact of incidents that cannot be prevented.

Information Security Management - Prevent occurrence of incidents or activities adversely affecting the confidentiality, integrity and availability of information in cloud services and service management process.

NEW QUESTION: 3

Which of the following would effectively verify the originator

of a transaction?

- A. Encrypting the transaction with the receiver's public key
- B. Digitally signing the transaction with the source's private key
- C. Using a secret password between the originator and the receiver
- D. Using a portable document format (PDF) to encapsulate transaction content

Answer: B

Explanation:

Explanation/Reference:

Explanation:

A digital signature is an electronic identification of a person, created by using a public key algorithm, to verify to a recipient the identity of the source of a transaction and the integrity of its content. Since they are a 'shared secret' between the user and the system itself, passwords are considered a weaker means of authentication. Encrypting the transaction with the recipient's public key will provide confidentiality for the information, while using a portable document format(PDF) will probe the integrity of the content but not necessarily authorship.

NEW QUESTION: 4

According to FASB, initial franchise fees should be recognized as income when

- A. the franchisor has collected the majority of fee in cash.
- B. the franchisor bills the franchisee.
- C. the franchisee shows the ability to pay the fee.
- D. the franchisor has substantially performed or satisfied all material services and conditions.

Answer: D

Explanation:

Explanation/Reference:

Explanation:

Accounting and reporting standards for franchisors require that revenue be recognized when the franchisor has substantially performed or satisfied all material services and conditions.
