Even if you are a student or a worker now who don't have [OG0-022](#) enough time to sit in front of the computers to look through all the questions designed for the test, you can download the ArchiMate 2 Part 2 Exam actual test torrent onto your [EX403 Reliable Test Price](#) smartphone to your heart's content so that you can read it and do exercises on it anytime and anywhere.

While how to get the OG0-022 exam certification, Free updating after buying our ArchiMate 2 Part 2 Exam latest study torrent.

#### **NEW QUESTION: 1**

Scenario: Two servers need to be added to a XenServer resource pool. The Procurement department is only able to place an order for the newer generation servers.

What are three necessary considerations when adding the hosts to the current pool? (Choose three.)

- A.** The CPU of the new server must have Intel or AMD Migration support.
- B.** The servers need to have the same amount of RAM.
- C.** Servers need to be from the same vendor as the existing servers.
- D.** The features of the older CPU must be a subset of the newer CPU.
- E.** CPUs need to be from the same vendor as the existing CPUs.

**Answer: A,D,E**

#### **NEW QUESTION: 2**

You have been asked by a recently formed DevOps team to qualify the principles for Continuous Delivery. Which method falls outside the practice of continuous delivery?

- A.** Tie code releases to operational constraints

- B. Use component-based architecture
- C. Deploy smaller code segments more often
- D. Automate the delivery pipeline

**Answer: D**

**NEW QUESTION: 3**

Your network contains a Web server that runs Windows Server 2008 R2. The server contains 10 Web sites. You need to back up the Microsoft ASP.NET configuration settings of one Web site. The solution must minimize the size of the backup. What should you do?

- A. Copy the %systemdrive%\inetpub folder.
- B. Copy the ApplicationHost.config file.
- C. Perform a system state backup.
- D. Copy the Web.config file.

**Answer: D**

Explanation:

In the web content directories, there may be optional web.config files that control the behavior for their level of the hierarchy and downward. They could be local or remote (if the content directory is on a UNC share, for example). They may contain IIS, ASP.NET or any other .NET framework configuration settings that can be specified at their level. By default there are no web.config files.

**NEW QUESTION: 4**

You are planning the deployment of Windows 7 to computers that are located in a main office, in branch offices, and in a store kiosk.

Computers in all three types of location use the same hardware. Kiosk computers are members of a workgroup. Kiosk computers must use specific settings for local security. Branch office computers must use BitLocker Drive Encryption.

You have the following requirements: Create deployment images. Minimize image maintenance.

You need to define an image-creation strategy that meets the requirements.

What should you do?

- A. Create one image to use for each location type. Encrypt the hard disks on the branch office computers prior to capturing the image.
- B. Create a single image to use for the main office computers and the branch office computers, and apply the required settings through Group Policy. Create a separate image to use for the kiosk computers.

**C.** Create a single image to use for all location types. Create a custom Windows security template for each location type.  
**D.** Create a single image to use for the branch office computers and the kiosk computers. Create a separate image to use for the main office computers.

**Answer: B**

Explanation:

Explanation/Reference:

Explanation:

hints:

Kiosk is belong to workgroup, it does not support by group policy. so it must use seperate image for its own local security.
