Answer: D

NEW QUESTION: 3

You are designing an AI solution that will use IoT devices to gather data from conference attendees and then analyze the data. The IoT device will connect to an Azure IoT hub.

You need to ensure that data contains no personally identifiable information before it is sent to the IoT hub. Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

Explanation

Note:

ASA Edge jobs run in containers deployed to Azure IoT Edge devices. They are composed of two parts:

* A cloud part that is responsible for job definition: users define inputs, output, query, and other settings (out of order events, etc.) in the cloud.

* A module running on your IoT devices. It contains the ASA engine and receives the job definition from the cloud.
