Just take immediate action, Maybe to pass 1z0-1041-22 exam is the first step for you to have a better career in IT industry, but for our Soaoj, it is the entire meaning for us to develop 1z0-1041-22 exam software.

Hurry up, start your study about 1z0-1041-22 Oracle Cloud Platform Enterprise Analytics 2022 Professional exam test now, here, our Oracle Cloud Platform Enterprise Analytics 2022 Professional exam training may be your ladder to success, Every page is full of well-turned words for your reference related wholly with the 1z0-1041-22 training prep.

**NEW QUESTION: 1** Welche der folgenden Maßnahmen kann BEST verhindern, dass bei der ausgelagerten Softwareentwicklung Sicherheitslücken entstehen?  
**A.** Liefertermine, Änderungsmanagementkontrolle und Budgetkontrolle  
**B.** Lizenzierung, Code-Besitz und Rechte an geistigem Eigentum  
**C.** Bescheinigung über die Qualität und Genauigkeit der geleisteten Arbeit  
**D.** Vertragliche Anforderungen für die Codequalität  
**Answer: C**

**NEW QUESTION: 2** A pediatric patient was hospitalized under an involuntary procedure. The patient's father wants to call his

lawyer about matters involving a lawsuit. Which of the following nursing actions is most appropriate?  
**A.** Allow the phone call without seeking any further information  
**B.** Tell the father that the lawsuit would be best settled after discharge from the hospital  
**C.** Call the lawyer and explain that the son is in the hospital  
**D.** Ask the father questions about the pending lawsuit  
**Answer: A**  
**Explanation:** The nursing action that is most appropriate is to allow the phone call without seeking any further information. A patient who is admitted under an involuntary procedure retains all civil rights, including the right to consult a lawyer and the right to sue.

**NEW QUESTION: 3**

Which congestion-avoidance or congestion-management technique can cause global synchronization?  
**A.** Weighted random early detection  
**B.** Tail drop  
**C.** Random early detection  
**D.** Weighted fair queuing  
**Answer: B**  
**Explanation:** Tail Drop Tail drop treats all traffic equally and does not differentiate between classes of service. Queues fill during periods of congestion. When the output queue is full and tail drop is in effect, packets are dropped until the congestion is eliminated and the queue is no longer full. Weighted Random Early Detection WRED avoids the globalization problems that occur when tail drop is used as the congestion avoidance mechanism on the router. Global synchronization occurs as waves of congestion crest only to be followed by troughs during which the transmission link is not fully utilized. Global synchronization of TCP hosts, for example, can occur because packets are dropped all at once. Global synchronization manifests when multiple TCP hosts reduce their transmission rates in response to packet dropping, then increase their transmission rates once again when the congestion is reduced.
