How Do You Catch a Criminal When Everyone Wears **1z0-1084-22 Reliable Exam Book** a Mask, It also explains how to use a custom ContentProvider from another app, We can guarantee you pass Oracle Cloud Infrastructure 2022 Developer Professional valid braindumps [Oracle Cloud Infrastructure 2022 Developer Professional](#) exam with high passing score even if you attend the exam in your first time.

If you have problems about our 1z0-1084-22 test guide such as installation, operation and so on, we will quickly reply to you after our online workers have received your emails.

All with the ultimate objective of helping the IT candidates to pass the 1z0-1084-22 exam test successfully, 1z0-1084-22 constantly provide the best quality practice exam products combined with the best customer service.

Come to Actualtests soon and find the most advanced, correct and guaranteed Oracle 1z0-1084-22 practice questions, If you fail the exam we will refund you the full dumps costs.

It is simple and suitable for browsing learning and can be printed on papers to be convenient for you to take notes, We have the best 1z0-1084-22 Dumps for guaranteed results.

That is why our 1z0-1084-22 practice engine is considered to be the most helpful exam tool in the market, Oracle 1z0-1084-22 dumps VCE is valid and professional exam materials.

Excellent Oracle 1z0-1084-22 Reliable Exam Book | Try Free Demo before Purchase

We will give back all your money by your transcripts, Our online service will give you 24/7 online support, We are also providing detailed 1z0-1084-22 pdf questions answer that will help you prepare for the Oracle Oracle Cloud Infrastructure 2022 Developer Professional test.

Set realistic time frames that suit your schedule, Importance of 1z0-1084-22 Exam Dumps, Pass 1z0-1084-22 Exam & Add Value To Your Professional Profile, We can make sure that the PDF version of the 1z0-1084-22 test questions will be very convenient for all people.

This is why thousands of candidates depends Soaoj one of the important reason, 1z0-1084-22 exam cram is edited by professional experts, and they are quite familiar with the exam center, and therefore, the quality can be guaranteed.

But you need to overcome the difficulty of 1z0-1084-22 exam dumps firstly, You will have a better understanding for your products.

#### **NEW QUESTION: 1**

You are developing an ASP.NET MVC application that allows users to log on by using a third-party authenticator.

You need to configure Microsoft Azure Access Control Services and the application.

Which five actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

#### **Answer:**

Explanation:

- 1 - Create a service namespace.
- 2 - Register the application as the relying party.
- 3 - Add a Security Token Service (STS) reference in Visual Studio 2012.
- 4 - Add the third-party as the identity provider.
- 5 - Generate provider rules for claims.

Explanation:

Box 1: Create a service namespace

The first step is to create an ACS Namespace. This is your Security Token Services (STS) that will generate Signed Identity tokens to be consumed by WAP. This will also be the only STS that WAP will trust.

Box 2: Register the application as a relaying partner.

Now that the Namespace is created, you will have to tell it about the WAP Portals that is expecting tokens from it. We add the WAP Tenant Portal as a Relying Party to ACS (Access Control Services).

Box 3: Add a Security Token Service (STS) reference in Visual Studio 2012.

Now that the Namespace is created, you will have to tell it about the WAP Portals that is expecting tokens from it.

1. Click on Relying Party Applications and click on Add to add the Windows Azure Pack tenant Portal as a Relying Party to this namespace. This essentially tells the ACS namespace that the Tenant Portal is expecting it to provide user identities.

2. You will now go to the Add Relying Party Application page where you can enter details about the WAP tenant Portal.

3. The easier option is to provide the federation Metadata from the tenant portal. Save the XML file locally on your computer

4. Now back in the ACS management portal, Upload the federation metadata file and provide a Display Name for the Relying Party.

5. Scroll Down to the Token Format section and choose the token format to be 'JWT'. By Default, the Windows Live Identity Provider will be selected. Deselect it if you do not want to allow users to sign in using their Live id. Under the Token Signing Settings section, select X.509 Certificate as the Type. Click on Save.

Box 4: Add the third-party as the identity provider.

We have our ACS and WAP portals setup. We now have to find a source of Identities that can be flown in to the WAP Portals through ACS. We configure external services to act as Identity Providers

Box 5: Generate provider rules for claims

We now have our Relying Party and our Identity Providers set up. We should now tell ACS how to transform the incoming Claims from these Identity providers so that the Relying Party can understand it. We do that using Rule Groups which are a set of rules that govern Claim Transformation. Since, we have two identity Providers, we will have to create a rule for each of these.
