NEW QUESTION: 1

The response rate for this cumulative record would BEST be described as:

- A. This graph is not a cumulative record.
- B. increasing trend.
- C. decreasing trend.
- D. a steady state.

Answer: A

NEW QUESTION: 2

Which of the following sentences BEST describes a Standard Change?

- A. A Change that correctly follows the required Change process
- B. A Change to the service provider's established policies and guidelines
- C. A pre-authorized Change that has an accepted and established procedure
- D. A Change that is made as the result of an audit

Answer: C

NEW QUESTION: 3

You have a server named Server1 that runs Windows Server 2012 R2.

You try to install the Microsoft .NET Framework 3.5 Features feature on Server1, but the installation fails repeatedly. You need to ensure that the feature can be installed on Server1.

What should you do?

- A. Run the Add-AppxProvisionedPackage cmdlet.
- B. Connect Server1 to the Internet.
- C. Install the Web Server (IIS) server role.
- D. Install Windows Identity Foundation (WIF) 3.5.

Answer: B

Explanation:

The files needed are no longer available on the local Hard drive. We need to connect the server to the Internet. Important to note that when starting with Windows Server 2012 R2 and Windows 8, the feature files for .NET Framework 3.5 (which includes .NET Framework 2.0 and .NET Framework 3.0) are not available on the local computer by default. The files have been removed. Files for features that have been removed in a Features on Demand configuration, along with feature files for .NET Framework 3.5, are available through Windows Update. By default, if feature files are not available on the destination server that is running Windows Server 2012 R2 Preview or Windows Server 2012 R2, the installation process searches for the missing files by connecting to Windows Update. You can override the default behavior by configuring a Group Policy setting or specifying an alternate source path during installation, whether you are installing by using the Add Roles and Features Wizard GUI or a command line.
