- D. 207.165.200.246 via Serial0/1/0

Answer: C

NEW QUESTION: 2

The Heartbleed bug was discovered in 2014 and is widely referred to under MITRE's Common Vulnerabilities and Exposures (CVE) as CVE-2014-0160. This bug affects the OpenSSL implementation of the transport layer security (TLS) protocols defined in RFC6520.

What type of key does this bug leave exposed to the Internet making exploitation of any compromised system very easy?

- A. Public
- B. Root
- C. Private
- D. Shared

Answer: C

Explanation:

Explanation/Reference:

The data obtained by a Heartbleed attack may include unencrypted exchanges between TLS parties likely to be confidential, including any form post data in users' requests. Moreover, the confidential data exposed could include authentication secrets such as session cookies and passwords, which might allow attackers to impersonate a user of the service.

An attack may also reveal private keys of compromised parties.

NEW QUESTION: 3

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality

(e.g., copy and paste, ability to navigate to external websites) will not be possible by design. Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task. Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided. Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab. Username and password

Use the following login credentials as needed:

To enter your username, place your cursor in the Sign in box and click on the username below.

To enter your password, place your cursor in the Enter password box and click on the password below.

Microsoft 365 Username:

[\[email#160;protected\]](#)@onmicrosoft.com

Microsoft 365 Password: #HSP.ug?\$p6un

If the Microsoft 365 portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.

The following information is for technical support only:

Lab instance: 11122308

You plan to create a script to automate user mailbox searches. The script will search the mailbox of a user named Allan Deyoung for messages that contain the word injunction. You need to create the search that will be included in the script.

To complete this task, sign in to the Microsoft 365 admin center.

Answer:

Explanation:

See explanation below.

Explanation

Step 1: Create a CSV file that contains information about the searches you want to run. The comma separated value (CSV) file that you create in this step contains a row for each user that you want to search. You can search the user's Exchange Online mailbox (which includes the archive mailbox, if it's enabled)

and their OneDrive for Business site. Or you can search just the mailbox or the OneDrive for Business site. You can also search any site in your SharePoint Online organization. The script that you run in Step 3 will create a separate search for each row in the CSV file.

1. Copy and paste the following text into a .txt file using NotePad. Save this file to a folder on your local computer. You'll save the other scripts to this folder as well.

```
ExchangeLocation,SharePointLocation,ContentMatchQuery,StartDate,EndDate [email#160;protected]
```

```
,https://contoso-my.sharepoint.com/personal/sarad_contoso_onmicrosoft_com OR legal),1/1/2000,12/31/2005 [email#160;protected]
```

```
,https://contoso-my.sharepoint.com/personal/sarad_contoso_onmicrosoft_com ORlegal),1/1/2006,12/31/2010 [email#160;protected]
```

```
,https://contoso-my.sharepoint.com/personal/sarad_contoso_onmicrosoft_com OR legal),1/1/2011,3/21/2016
```

```
,https://contoso.sharepoint.com/sites/contoso,, ,3/21/2016
```

```
,https://contoso-my.sharepoint.com/personal/davidl_contoso_onmicrosoft_com,,1/1/2015,
```

```
,https://contoso-my.sharepoint.com/personal/janets_contoso_onmicrosoft_com,,1/1/2015,
```

The first row, or header row, of the

file lists the parameters that will be used

byNew-ComplianceSearch cmdlet to create a new Content Searches.

Each parameter name is separated by a comma. Make sure there

aren't any spaces in the header row. Each row under the header

row represents the parameter values for each search. Be sure to

replace the placeholder data in the CSV file with your actual

data.

2. Open the .txt file in Excel, and then use the information in the following table to edit the file with information for each search.

3. Save the Excel file as a CSV file to a folder on your local computer. The script that you create in Step 3 will use the information in this CSV file to create the searches.
