NEW QUESTION: 3

Which action does route poisoning take that serves as a loop-prevention method?

A. It immediately sends routing updates with a metric of 255 to all devices.

B. It prohibits a router from advertising back onto the interface from which it was learned.

C. It poisons the route by tagging it uniquely within the network.

D. It advertises a route with an unreachable metric back onto the interface from which it was learned.

E. It immediately sends routing updates with an unreachable metric to all devices.

Answer: E

Explanation:

With route poisoning, when a router detects that one of its connected routes has failed, the router will poison the route by assigning an infinite metric to it and advertising it to neighbors.
