We guarantee that all candidates can pass the exam with our JN0-104 test engine materials, 100%, For candidates who are going to buy JN0-104 exam materials online, they may pay more attention to the website safety.

#### **NEW QUESTION: 1**

A NetScaler Engineer is reviewing the performance of a NetScaler appliance and notices that TCP multiplexing (TCP connection reuse) appears to NOT be working for a virtual server.

What could be the cause of this issue?

- A. The virtual server was created as type SSL\_BRIDGE
- B. Persistence is enabled on the virtual server
- C. Compression is enabled on the services
- D. HTTP services are bound to the virtual server

**Answer: A**

## NEW QUESTION: 2

CORRECT TEXT

RHCE Test Configuration Instructions

Information for the two systems you will use in test is the following:

system1.group3.example.com: is one of the main sever.

system2.group3.example.com: mainly used as a client.

Password for both of the two systems is atenorth

System's IP is provided by DHCP, you can regard it as normal, or you can reset to Static IP in accordance with the following requirements:

system1.group3.example.com: 172.24.3.5

system2.group3.example.com: 172.24.3.10

The subnet mask is 255.255.255.0

Your system is a member of DNS domain group3.example.com. All systems in DNS domain group3.example.com are all in subnet 172.24.3.0/255.255.255.0, the same all systems in this subnet are also in group3.example.com, unless specialized, all network services required to be configured can be accessed by systems of domain group3.

host.group3.example.com provides a centralized authentication service domain GROUP3.EXAMPLE.COM, both system1 and system2 have already been pre-configured to be the client for this domain, this domain provides the following user account:

Firewall is enabled by default, you can turn it off when deemed appropriate, other settings about firewall may be in separate requirements.

Your system will be restarted before scoring, so please ensure that all modifications and service configurations you made still can be operated after the restart without manual intervention, virtual machine instances of all examinations must be able to enter the correct multi-user level after restart without manual assistance, it will be scored zero if the test using virtual machine system cannot be restarted or be properly restarted.

Corresponding distribution packages for the testing using operating system Red Hat Enterprise Linux version can be found in the following link:

<http://server1.group3.example.com/rhel>

Part of the requirements include host security, ensure your host security limit does not prevent the request to allow the host and network, although you correctly configured the network service but would have to allow the host or network is blocked, this also does not score.

You will notice that some requirements which clearly do not allow services be accessed by service domain my133t.org, systems of this domain are in subnet 172.25.1.0/252.255.255.0, and systems of these subnets also belong to my 133t.org domain.

PS: Notice that some test questions may depend on other exam questions, for example, you might be asked to perform a series of restrictions on a user, but this user creation may be required in other questions. For convenient identification,

each exam question has some radio buttons to help you identify which questions you have already completed or not completed. Certainly, you do not need to care these buttons if you don't need them.

Configure Link Aggregation

Configure a link between system1.group3.example.com and system2.group3.example.com as required:

This link uses interfaces eth1 and eth2

This link still can work when one interface failes

This link uses the following address 172.16.3.20/255.255.255.0 on system1 This link uses the following address 172.16.3.25/255.255.255.0 on system2 This link remains normal after the system is restarted

**Answer:**

Explanation:

If you forget how to write the name, you can search examples in /var/share/doc/team-1.9/example\_configs/

**NEW QUESTION: 3**

- A. Option D
- B. Option B
- C. Option A
- D. Option C
- E. Option E

**Answer: B,E**
