This incredible self- evaluating feature of our Microsoft MS-900-KR practice exam software identifies your weak areas in the preparation, In our study materials, you can find the right one for you.

NEW QUESTION: 1

Within VRRP the election process of becoming the master switch takes place with the following precedence Step 1 The switch with the virtual router IP address becomes the master switch Step 2 The switch with the highest VRRP priority becomes the master switch Step 3 The switch with the highest IP address becomes the master switch

- A. False
- B. True

Answer: B

NEW QUESTION: 2

What is one benefit of an HPE hybrid infrastructure?

- A. It drastically reduces the time for service and resource deployment.
- B. It ensures that IT budgets use a fixed cost structure rather than a variable one.
- C. It reduces support costs by eliminating all self-provisioning mechanisms.
- D. It enhances security because it requires all resources and services to remain on-site.

Answer: B

NEW QUESTION: 3

Which of the following BEST ensures that security risks will be reevaluated when modifications in application developments are made?

- A. A change control process
- B. Background screening
- C. A problem management process
- D. Business impact analysis (BIA)

Answer: A

Explanation:

A change control process is the methodology that ensures that anything that could be impacted by a development change will be reevaluated. Problem management is the general process intended to manage all problems, not those specifically related to security. Background screening is the process to evaluate employee references when they are hired. BIA is the methodology used to evaluate risks in the business continuity process.
