NEW QUESTION: 4

What is the benefit of the RESOURCEUTILIZATION option on the client during a restore?

- A. to increase the memory usage on the client
- B. to decrease the memory usage on the client
- C. to increase the communication buffer from the client to the server
- D. to increase the number of concurrent restore sessions

Answer: D

Explanation:

Use the resourceutilization option in your option file to regulate the level of resources the IBM Spectrum Protec server and client can use during processing.

When you request a restore, the default is to use a maximum of one session.

Additional restore sessions are based on:
resourceutilization value

Etc.
