Various Learning Modes, One of outstanding features of NS0-403 Online soft test engine is that it has testing history and performance review, and you can have a general review of what you have learned before next training.

NEW QUESTION: 1

A company is upgrading its 3,000 client computers to Office 365 ProPlus. The company uses the Telemetry Dashboard to identify document compatibility issues.

The Telemetry Agent is deployed to all client computers. The telemetry environment is described in the following table.

You need to ensure that telemetry data is collected for more than 20 client computers at a time.

What should you do?

- A.** Migrate the telemetry database to a computer that runs SQL Server 2008.
- B.** Migrate the Telemetry Processor to a computer that runs Windows Server 2012.
- C.** Use Group Policy to set the MaxConnectionsPerServer setting to 100.
- D.** Use the Registry Editor to trigger the data collection.

Answer: B

Explanation:

For test or small production environments You can use computers that run Windows 7, Windows 8, and Windows 8.1 in test environments and in small production environments. There is a limit of 20 concurrent connections for client operating systems, but in small environments, the agent randomization setting should minimize any chances of more than 20 agents connecting at one time.
