NEW QUESTION: 3

Refer to the exhibit.

A network technician is asked to design a small network with redundancy. The exhibit represents this design, with all hosts configured in the same VLAN. What conclusions can be made about this design?

- A. The router will not accept the addressing scheme.
- B. The router interfaces must be encapsulated with the 802.1Q protocol.
- C. This design will function as intended.
- D. Spanning-tree will need to be used.
- E. The connection between switches should be a trunk.

Answer: A

Explanation:

Each interface on a router must be in a different network. If two interfaces are in the same network, the router will not accept it and show error when the administrator assigns it.
