NEW QUESTION: 1How must IBM Notes Traveler be administered after the server has been added to a high availability pool?**A.** A web browser must be used to access the lotustraveler.nsf.**B.** The IBM Domino Administrator client must be used to access the lotustraveler.nsf on any of the members of the server pool.**C.** The IBM Notes client must be used to access the lotustraveler.nsf.**D.** After integration into the server pool, only the IBM Domino dynamic policies may be used.**Answer: A**

NEW QUESTION: 2Hot Area:**Answer:** Explanation:Note:*From scenario: Allow administrators to promote search query results across the entire company.*Query rules are composed of three components:Condition When to apply the rule?Action What to do when the rule is matched?Publishing When should the rule be active?*ActionsOnce the condition has been configured the fun begins! The next step is to decide what to do when the query rule applies. Essentially there are three options here:Add Promoted Result Add Result Block Change ranked results by changing the query* Add Promoted ResultA promoted result is a

result that appears at the top of the search results, this is particularly useful way to promote a particular search result. For example, you may want a query for "human resources info" to promote a link to the human resources SharePoint Site. NEW QUESTION: 3A company plans to implement solutions that use Common Data Service as a data storage. You need to recommend features to meet the company's needs. Which features should you recommend? To answer, drag the appropriate features to the correct requirements. Each feature may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. NOTE: Each correct selection is worth one point. **Answer:** Explanation: Explanation: Box 1: business rules You can create business rules and recommendations to apply logic and validations without writing code or creating plug-ins. Business rules provide a simple interface to implement and maintain fast-changing and commonly used rules. Box 2: business process flows Flows Power Automate includes several types of processes, each designed for a different purpose: * Automated flows. Create a flow that performs one or more tasks automatically after it's triggered by an event. * Button flows. Perform repetitive tasks simply by tapping a button on your mobile device. * Scheduled flows. Create a flow that performs one or more tasks on a schedule such as once a day, on a specific date, or after a certain time. * Business process flows. Ensure that people enter data consistently and follow the same steps every time they work in an app by creating a business process flow. * Workflows and actions. Dynamics 365 customizers may be familiar with the classic Common Data Service processes, which are workflows and actions. Box 3: Common Data Model Model-driven app design is a component-focused approach to app development. Model-driven app design doesn't require code and the apps you make can be simple or very complex. Unlike canvas app development where the designer has complete control over app layout, with model-driven apps much of the layout is determined for you and largely designated by the components you add to the app.
