NEW QUESTION: 2 Which of the following is MOST critical for the successful implementation and maintenance of a security policy?
A. Management support and approval for the implementation and maintenance of a security policy
B. Assimilation of the framework and intent of a written security policy by all appropriate parties
C. Stringent implementation, monitoring and enforcing of rules by the security officer through access control software
D. Enforcement of security rules by providing punitive actions for any violation of security rules
Answer: B
Explanation:ExplanationAssimilation of the framework and intent of a written security policy by the users of the system is critical to the successful implementation and maintenance of the security policy. A good password system may exist, but if the users of the system keep passwords written on their desk,

the password is of little value. Management support and commitment is no doubt important, but for successful implementation and maintenance of security policy, educating the users on the importance of security is paramount. The stringent implementation, monitoring and enforcing of rules by the security officer through access control software, and provision for punitive actions for violation of security rules, is also required, along with the user's education on the importance of security.

NEW QUESTION: 3 Refer to the exhibit. The ACL is placed on the inbound Gigabit 0/1 interface of the router. Host 192.168.10.10 cannot SSH to host 192.168.100.10 even though the flow is permitted. Which action resolves the issue without opening full access to this router?
A. Move the SSH entry to the beginning of the ACL
B. Run the show access-list FILTER command to view if the SSH entry has any hit statistic associated with it
C. Temporarily move the permit ip any any line to the beginning of the ACL to see if the flow works
D. Temporarily remove the ACL from the interface to see if the flow works

Answer: A
