NEW QUESTION: 1

When outlining the potential financial savings from having virtualized network services modules, which statement would be a supportable statement to make? Select the best response.

A. Every time a new virtual context is created, the services modules draw 50 percent more power than a single-context operation, so the maximum number of virtual contexts is limited to four per module. With the maximum of four virtual contexts, the total power consumed is 250 percent of a single context operation, which is 150 percent less power than four physical service appliances would draw.

B. The savings will depend upon the requirements for each data center but can be as much as PassGuide.com-Make You Succeed To Pass IT Exams PassGuide 646-985 80 percent on power and 30 units of rack space.

C. Because the services are virtual, virtual network services modules will take up no rack space and will consume no power.
D. Virtual services modules can support up to a maximum of four virtual contexts, so they can save up to 75 percent of both power and rack space.

Answer: B

Explanation:
Section: (none)

NEW QUESTION: 2

US-based BetaBank have accumulated Japanese yen, Japanese government bonds, options on Japanese yen, and positions in commodities that have a positive correlation with yen. Which one of the four following non-statistical risk measures could be used to evaluate the BetaBank's exposure to the Japanese economy?

- A. Position turnover
- B. Position volatility
- C. Position concentrations
- D. Position sensitivities

Answer: C

NEW QUESTION: 3

SecurityPin must be stored in such a way that

- A. Always Encrypted is correct, but only the WebAppIdentity service principal should be given access to the certificate.
- B. Always Encrypted is correct, but only the WebAppIdentity service principal should be given access to the certificate.

Answer: B

Explanation:
Explanation

Enable Always Encrypted is correct, but only the WebAppIdentity service principal should be given access to the certificate.

Scenario: Users' SecurityPin must be stored in such a way that

access to the database does not allow the viewing of SecurityPins. The web application is the only system that should have access to SecurityPins.
