## NEW QUESTION: 2

Note: This question is part of a series of questions that use the same scenario. For your convenience, the scenario is repeated in each question. Each question presents a different goal and answer choices, but the text of the scenario is the same in each question in this series.

You have a Microsoft SQL Server database that contains the following tables.

The following columns contain date information:

- Date[Month] in the mmyyyy format
- Date[Date\_ID] in the ddmmyyyy format
- Date[Date\_name] in the mm/dd/yyyy format
- Monthly\_returns[Month\_ID] in the mmyyyy format

The Order table contains more than one million rows.

The Store table has a relationship to the Monthly\_returns table on the Store\_ID column. This is the only relationship between the tables.

You plan to use Power BI Desktop to create an analytics solution for the data.

You plan to create a chart that displays total Order[Order\_amount] by Store[Name].

You need to modify the model to ensure that you can create the chart.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

**A.** To the Order table, add a measure that uses the COUNT('Order'[Order\_amount]) DAX formula.

**B.** Create a relationship between the Order table and the Store table.

**C.** To the Order table, add a column that uses the RELATED('Store'[Store\_ID]) DAX formula.

**D.** To the Order table, add a measure that uses the COUNTA('Order'[Order\_ID]) DAX formula.

**Answer: B,C**

## NEW QUESTION: 3

Which three methods are supported for authenticating user access to the command line interface (CLI)? (Choose three.)

- A. Active Directory
- B. LDAP
- C. TACACS+
- D. RADIUS
- E. local database

**Answer: C,D,E**

#### **NEW QUESTION: 4**

You are a licensing specialist. Your customer is Fourth Coffee, a small coffee retailer that specializes in coffee beans from around the world.

##### Company Background

Fourth Coffee was founded on September 4, 2003, and has 35 employees. The company's main office and 10 retail stores are located in Canada.

Due to budget constraints, Fourth Coffee does not have a dedicated IT department and can upgrade hardware and software only every four years.

##### Network Description

The main office has five desktops and two servers. One server runs Microsoft Small

Business Server 2003, and the second server runs Microsoft Windows Server 2003,

Standard Edition, with Microsoft Office 2003 Professional Enterprise Edition through Terminal Server.

Each retail store has a new desktop that connects to the terminal server in the main office.

##### Current Licensing Solution

Before Terminal Server was deployed, some older versions of Office were acquired through Full Package Product, and some older versions were preinstalled on desktops that were purchased one year ago. Some Office licenses were purchased with Software

Assurance through the Open Business program.

Confusion exists as to whether Fourth Coffee is properly licensed.

##### Business Goals

Fourth Coffee expects to open a total of 10 additional stores in England and Australia in the next year.

The company president wants to standardize all desktops on the latest version of Office

Professional, Enterprise Edition; Windows XP Professional; and Windows Server with

Terminal Server enabled.

##### End of repeated scenario

You need to recommend the most appropriate software-license acquisition model for

Fourth Coffee.

What should you recommend?

- A.** The main office should acquire all server and application licenses for all Canada locations. Each store in England and Australia should acquire its own licenses.
- B.** The main office and each store should acquire its own OEM server and application licenses. The main office should purchase Software Assurance.
- C.** The main office should acquire all licenses for all locations.
- D.** The main office should acquire all server and application licenses for all locations. Each store should purchase its own hardware with OEM versions of Windows XP Professional installed.

**Answer: D**
