NEW QUESTION: 1

The security administrator receives an email on a non-company account from a coworker stating that some reports are not exporting correctly. Attached to the email was an example report file with several customers' names and credit card numbers with the PIN.

Which of the following is the BEST technical controls that will help mitigate this risk of disclosing sensitive data?

- A.** Create a user training program to identify the correct use of email and perform regular audits to ensure compliance
- B.** Implement a DLP solution on the email gateway to scan email and remove sensitive data or files
- C.** Classify all data according to its sensitivity and inform the users of data that is prohibited to share
- D.** Configure the mail server to require TLS connections for every email to ensure all transport data is encrypted

Answer: B

NEW QUESTION: 2

Reports of the fact that the company's financial performance is poor, and that the company's stock price is falling, have caused a significant loss of confidence among investors. The company's management has been accused of mismanagement and of covering up the truth. The company's reputation has been severely damaged, and it is now facing a crisis of confidence. The company's management must take immediate action to restore confidence and to address the underlying issues. The company's management must be transparent and honest with investors, and must take steps to improve the company's financial performance. The company's management must also take steps to improve the company's reputation and to address the concerns of investors. The company's management must be proactive and take steps to prevent such a crisis from occurring again.
