The Cisco Data Center Unified Computing Infrastructure Troubleshooting certificate is very necessary right now, more than ever before.

NEW QUESTION: 1

A Unity 400 system has Data at Rest Encryption licensed and enabled. Which operation(s) must be performed from the Unisphere Settings window to ensure the system is still operational after SP replacements?

- A. Backup Keystore File
- B. Download Audit Log
- C. Download Audit Log and Checksum
- D. Download Checksum

Answer: A

Explanation:

The keystore is tied to the storage processors, so care must be taken when performing service operations in order to preserve the encryption keys. In the event that the chassis and both storage processors need to be replaced, both storage processors should not be replaced at the same time. Instead, the chassis replacement should be followed while retaining one SP until the array is back online before replacing the second SP. In the case that storage processors have already been replaced at the same time and the keystore was lost, the keystore may be restored from an external backup.

NEW QUESTION: 2

Which statement is true given Sun or IBM JRE is not installed on a Windows system and a user with Windows administrator privileges needs to connect to the Tivoli Enterprise Portal Server using a web browser?

- A. Before attempting to connect, the user must manually download and install the SUN JRE.
- B. When attempting to connect, the SUN JRE will be downloaded and installed automatically.
- C. Before attempting to connect, the user must manually download and install the IBM JRE.
- D. When attempting to connect, the IBM JRE will be downloaded and installed automatically.

Answer: D

NEW QUESTION: 3

You have an Azure Active Directory tenant named Contoso.com that includes following users:

Contoso.com includes following Windows 10 devices:

You create following security groups in Contoso.com:

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Box 1: Yes

User1 is a Cloud Device Administrator.

Device2 is Azure AD joined.

Group1 has the assigned to join type. User1 is the owner of Group1.

Note: Assigned groups - Manually add users or devices into a

static group.

Azure AD joined or hybrid Azure AD joined devices utilize an organizational account in Azure AD Box 2: No User2 is a User Administrator.

Device1 is Azure AD registered.

Group1 has the assigned join type, and the owner is User1.

Note: Azure AD registered devices utilize an account managed by the end user, this account is either a Microsoft account or another locally managed credential.

Box 3: Yes

User2 is a User Administrator.

Device2 is Azure AD joined.

Group2 has the Dynamic Device join type, and the owner is User2.
