- A. Option A
- B. Option D
- C. Option B
- D. Option C

Answer: D

Explanation:

Distribution point groups provide a logical grouping of distribution points and collections for content distribution. A Distribution point group is not limited to distribution points from a single site, and can contain one or more distribution points from any site in the hierarchy. When you distribute content to a distribution point group, all distribution points that are members of the distribution point group receive the content.

In working with a manipulative client, which of the following nursing interventions would be most appropriate?

- A. Providing a consistent set of guidelines and rules
- B. Redirecting the client
- C. Bargaining with the client as a strategy to control the behavior
- D. Assigning the client to different staff persons each day

Answer: A

Explanation:

Explanation/Reference:

Explanation:

(A) This answer is incorrect. Bargaining is a manipulative act, which the nurse could expect from the client.

(B) This answer is incorrect. Confrontation is an effective nursing strategy with manipulative behavior.

Redirection is appropriate for the client who is out of touch with reality. (C) This answer is correct.

Manipulative clients must abide by consistent rules. (D) This answer is incorrect. Manipulation is kept at a minimum if the same staff person is assigned to the client. Often the client will attempt to play staff persons against each other.
