**NEW QUESTION: 1**

- A. Option B
- B. Option C
- C. Option A
- D. Option D

**Answer: A**

**NEW QUESTION: 2**

Your network contains an Active Directory domain named contoso.com. All servers run Windows Server 2012 R2. The domain contains two servers. The servers are configured as shown in the following table.

All client computers run Windows 8 Enterprise.

You plan to deploy Network Access Protection (NAP) by using IPsec enforcement.

A Group Policy object (GPO) named GPO1 is configured to deploy a trusted server group to all of the client computers.

You need to ensure that the client computers can discover HRA servers automatically.

Which three actions should you perform? (Each correct answer presents part of the solution. Choose three.)

**A.** On Server2, configure the EnableDiscovery registry key.

**B.** On DC1, create an alias (CNAME) record.

**C.** On all of the client computers, configure the EnableDiscovery registry key.

**D.** In a GPO, modify the Request Policy setting for the NAP Client Configuration.

**E.** On DC1, create a service location (SRV) record.

**Answer: C,D,E**

**NEW QUESTION: 3**

Which of the following is not appropriate in addressing object reuse?

**A.** Clearing buffered pages, documents, or screens from the local memory of a terminal or printer.

**B.** Deleting files on disk before reusing the space.

**C.** Clearing memory blocks before they are allocated to a program or data.

**D.** Degaussing magnetic tapes when they're no longer needed.

**Answer: B**

Explanation:

Object reuse requirements, applying to systems rated TCSEC C2 and above, are used to protect files, memory, and other objects in a trusted system from being accidentally accessed by users who are not authorized to access them. Deleting files on disk merely erases file headers in a directory structure. It does not clear data from the disk surface, thus making files still recoverable. All other options involve clearing used space, preventing any unauthorized access. Source: RUSSEL, Deborah & GANGEMI, G.T. Sr., Computer Security Basics, O'Reilly, July 1992 (page 119).
