Answer: B

NEW QUESTION: 2

CORRECT TEXT

The SAS data set QTR1_REVENUE is listed below:

The following SAS program is submitted:

```
proc sort data = qtr1_revenue;  
by destination descending revenue;  
run;
```

Which one of the following represents the first observation in the output data set?

Answer:

Explanation:

D

NEW QUESTION: 3

Which two tunneling techniques support IPv6 multicasting?
(Choose two.)

A. 6to4

B. 6PE

C. GRE

D. ISATAP

E. 6over4

Answer: C,E

Explanation:

When IPv6 multicast is supported (over a 6to4 tunnel), an IPv6 multicast routing protocol must be used. Restrictions for Implementing IPv6 Multicast IPv6 multicast for Cisco IOS software uses MLD version 2. This version of MLD is fully backward-compatible with MLD version 1 (described in RFC 2710). Hosts that support only MLD version 1 will interoperate with a router running MLD version 2. Mixed LANs with both MLD version 1 and MLD version 2 hosts are likewise supported. IPv6 multicast is supported only over IPv4 tunnels in Cisco IOS Release 12.3(2)T, Cisco IOS Release 12.2 (18)S, and Cisco IOS Release 12.0(26)S. When the bidirectional (bidir) range is used in a network, all routers in that network must be able to understand the bidirectional range in the bootstrap message (BSM). IPv6 multicast routing is disabled by default when the ipv6 unicast-routing command is configured. On Cisco Catalyst

6500 and Cisco 7600 series routers, the ipv6 multicast-routing also must be enabled in order to use IPv6 unicast routing
