**NEW QUESTION: 3**

You design a Business Intelligence (BI) solution by using SQL Server 2008. You design a SQL Server 2008 Analysis Services (SSAS) solution by using SQL Server 2008. The solution uses a source database that contains a table named Customer. The Customer table has multiple columns. You have read-only access to the database. You plan to reduce the number of columns in the Customer table. You need to split the Customer table to be distributed across multiple table definitions. What should you do?

- A. Create multiple data sources for the SSAS solution.
- B. Create multiple data source views for the SSAS solution.
- C. Create multiple named queries for the SSAS solution.
- D. Create multiple database views for the source database.

**Answer: C**
