**NEW QUESTION: 1**Use RS485 communication, the maximum communication distance are ( ) meters.**A. 0B. 1C. 2D. 3****Answer: C**

**NEW QUESTION: 2**Which of the following statements is not true of the test data approach to testing an accounting system?**A.** The test data must consist of all possible valid and invalid conditions.**B.** The test data need consist of only those valid and invalid conditions that interest the auditor.**C.** Only one transaction of each type need be tested.**D.** Test data are

processed by the client's computer programs under the auditor's control.**Answer: A**Explanation:Explanation/Reference:Explanation: Choice "D" is correct. While the auditor will frequently use many valid and invalid conditions, it is not feasible to test every possible valid and invalid condition using a test data approach.Choice "A" is incorrect. Test data consists of a set of fictitious entries or inputs that are processed through the client's computer system under the control of the auditor. Choice "B" is incorrect. The auditor need only include valid and invalid conditions that interest the auditor.Choice "C" is incorrect. Only one transaction of each type need be tested, as the system should process similar transactions in a consistent manner.

**NEW QUESTION: 3**Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided. Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab. Username and passwordUse the following login credentials as needed:To enter your username, place your cursor in the Sign in box and click on the username below.To enter your password, place your cursor in the Enter password box and click on the password below.Microsoft 365 Username:[email#160;protected]@onmicrosoft.comMicrosoft 365 Password: #HSP.ug?\$p6unIf the Microsoft 365 portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.The following information is for technical support only:Lab instance: 11122308You need to create an Azure Information Protection label to meet the following requirements:\* Content must expire after 21 days.\* Offline access must be allowed for 21 days only.\* Documents must be protected by using a cloud key.\* Authenticated users must be able to view content only.To complete this task, sign in to the Microsoft 365 admin center.**Answer:** Explanation:See explanation below.Explanation1. If you haven't already done so, open a new browser window and sign in to the Azure portal. Then navigate to the Azure Information Protection pane.For example, in the search box for resources, services, and docs: Start typing Information and select Azure

Information Protection.2. From the Classifications &gt; Labels menu option: On the Azure Information Protection - Labels pane, select the label you want to change.On the Label pane, locate Set permissions for documents and emails containing this label, and select Protect.3. Select Protection.4. On the Protection pane, select Azure (cloud key).5. Select Set permissions to define new protection settings in this portal.6. If you selected Set permissions for Azure (cloud key), this option lets you select users and usage rights.To specify the users that you want to be able to open protected documents and emails, select Add permissions.Then on the Add permissions pane, select the first set of users and groups who will have rights to use the content that will be protected by the selected label:\* Choose Select from the list where you can then add all users from your organization by selecting Add &lt;organization name&gt; - All members. This setting excludes guest accounts. Or, you can select Add any authenticated users, or browse the directory.When you choose all members or browse the directory, the users or groups must have an email address. In a production environment, users and groups nearly always have an email address, but in a simple testing environment, you might need to add email addresses to user accounts or groups.\* Change the File Content Expiration setting to 21 days.\* Change the Allow offline access setting to 21 days.When you have finished configuring the permissions and settings, click OK. This grouping of settings creates a custom template for the Azure Rights Management service. These templates can be used with applications and services that integrate with Azure Rights Management.7. Click OK to close the Protection pane and see your choice of User defined or your chosen template display for the Protection option in the Label pane.8. On the Label pane, click Save.9. On the Azure Information Protection pane, use the PROTECTION column to confirm that your label now displays the protection setting that you want:\* A check mark if you have configured protection.\* An x mark to denote cancellation if you have configured a label to remove protection.\* A blank field when protection is not set.When you clicked Save, your changes are automatically available to users and services. There's no longer a separate publish option.Reference:
