NEW QUESTION: 1The Chief Executive Officer (CEO) of an Internet service provider (ISP) has decided to limit the company's contribution to worldwide Distributed Denial of Service (DDoS) attacks. Which of the following should the ISP implement? (Select TWO).

A. Block traffic from the ISP's networks destined for blacklisted IPs. **B.** Block traffic with an IP source not allocated to customers from exiting the ISP's network. **C.**

Prevent the ISP's customers from querying DNS servers other than those hosted by the ISP. **D.** Scan the ISP's customer networks using an up-to-date vulnerability scanner. **E.** Notify customers when services they run are involved in an attack.

Answer: B, E Explanation: Since DDOS attacks can originate from many different devices and thus makes it harder to defend

against, one way to limit the company's contribution to DDOS attacks is to notify customers about any DDOS attack when they run services that are under attack. The company can also block IP sources that are not allocated to customers from the existing SIP's network.

NEW QUESTION: 2A security operation team recently detected a breach of credentials. The team mitigated the risk and followed proper processes to reduce risk. Which of the following processes would BEST help prevent this issue from happening again?**A.** Lessons learned**B.** Chain of custody**C.** Risk assessment**D.** Penetration test**Answer: A**

NEW QUESTION: 3What is required to report on a combination of characteristics, such as customer, product, and region?**A.** Primary cost elements**B.** G/L accounts**C.** Profitability segments**D.** Profit centers**Answer: C**

NEW QUESTION: 4**Answer:** Explanation:ExplanationBox 1: retention There are two ways to delete Storage Analytics data: by manually making deletion requests or by setting a data retention policy. Manual requests to delete Storage Analytics data are billable, but delete requests resulting from a retention policy are not billable.To avoid unnecessary charges, set a retention policy for logging and metrics.Note: By default, Storage Analytics will not delete any logging or metrics data. Blobs and table entities will continue to be written until the shared 20TB limit is reached. Once the 20TB limit is reached, Storage Analytics will stop writing new data and will not resume until free space is available.Box 2: 365You can configure two data retention policies: one for logging and one for metrics. When enabled for both, Storage Analytics will delete logs and table entries older than the specified number of days. The maximum retention period is 365 days (1 year).
