**C.** The two expenditure types are not assigned to the reference data set that is assigned to the project unit in which the transaction is performed.  
**D.** The two expenditure types are not assigned to the reference data set that is assigned to the business unit in which the transaction is performed.  
**Answer: C**  
Explanation: Explanation/Reference: Reference:  
[Implementing-Project-Financial-Management-and-Grants-Management.pdf](#) (19A Part # F11256-01) Chapter 3 - Define Project Organizations Topic - Set Assignments and Project Data - How They Work Together (Page 29) Business Unit as Set Determinant Business units enable you to control and report on financial transactions, usually for specific geographical entities within the enterprise. For project management purposes, assign the Project Accounting business function to the business unit. Business unit is a set determinant for the project-related reference data objects described in the following table.  
Ref Data Object Entities Project Accounting Definition Project Types

Project RatesProject rate schedulesProject Unit as Set DeterminantUse project units to enforce consistent project management practices across your enterprise. Project unit is a set determinant for the reference data objects described in the following table.

Ref Data Object	Entities	Project Definition Class codes	financial plan types	project plan types	and project roles	Project Transaction Types	Expenditure types	and work types
You can only select class codes, plan types, roles, expenditure types and work types that are assigned to the same set as the project unit. To enable expenditure types and work types for use on projects owned by a project unit, assign the set associated with the Project Transaction Types reference data object to those entities								

**NEW QUESTION: 4**

A. VisitorAppendTourLi  
 B. VisitorSyncIdentifiers  
 C. VisitorgetIDs  
 D. VisitorMarketingCloudID

**Answer: A**
