Answer: B

Explanation:

<https://docs.aws.amazon.com/systems-manager/latest/userguide/parameter-store-advanced-parameters.html>

NEW QUESTION: 2

What is a function of client provisioning?

- A. Client provisioning checks a dictionary attribute with a value.
- B. Client provisioning ensures an application process is running on the endpoint.
- C. Client provisioning checks the existence, date, and versions of the file on a client.
- D. Client provisioning ensures that endpoints receive the appropriate posture agents.

Answer: B

NEW QUESTION: 3

Many organizations create network maps of their network system to visualize the network and understand the relationship between the end devices and the transport layer that provide services. Which of the following are the techniques used for network mapping by large organizations?

Each correct answer represents a complete solution. Choose three.

Answer:

Explanation:

D is incorrect. Packet crafting is a technique that allows probing firewall rule-sets and finding entry points into the targeted system or network. This can be done with a packet generator. A packet generator is a type of software that generates random packets or allows the user to construct detailed custom packets. Packet generators utilize raw sockets. This is useful for testing implementations of IP stacks for bugs and security vulnerabilities.

NEW QUESTION: 4

Your customer wants to add three new locations. These locations will be used in France, Germany, and the USA. Where do you create these locations? Please choose the correct answer

- A. In the Location elements in the CSF Corporate data model
- B. In the Manage Organization, Pay and Job Structure tool
- C. In the Manage data tool
- D. In the location element in the CSF Corporate data model

Answer: B
