- D. dbsnmp

Answer: A

NEW QUESTION: 2

You need to deploy a new version of the Label Maker application.

Which three actions should you perform in sequence?

To answer, move the appropriate actions from the list of

actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

Explanation

Create an alias of the image with fully qualified path to the registry

Log in to the registry and push image

Restart the cluster.

Topic 3, Case Study

Overview

Contoso, Ltd. is a consulting company that has a main office in Montreal and two branch offices in Seattle and New York.

The Montreal office has 2,000 employees. The Seattle office has 1,000 employees- The New York office has 200 employees.

All the resources used by Contoso are hosted on-premises.

Contoso creates a new Azure subscription. The Azure Active Directory (Azure AD) tenant uses a domain named

contoso.onmicrosoft.com. The tenant uses the P1 pricing tier.

Existing Environment

The network contains an Active Directory forest named contoso.com. All domain controllers are configured as DNS servers and host the contoso.com DNS zone.

Contoso has finance, human resources, sales, research, and information technology departments. Each department has an organizational unit (OU) that contains all the accounts of that respective department. All the user accounts have the department attribute set to their respective department. New users are added frequently.

contoso.com contains a user named User1.

All the offices connect by using private links.

Contoso has data centers in the Montreal and Seattle offices. Each data center has a firewall that can be configured as a VPN device.

All infrastructure servers are virtualized. The virtualization environment contains the servers in the following table.

Contoso uses two web applications named App1 and App2. Each instance on each web application requires 1 GB of memory. The Azure subscription contains the resources in the following table.

The network security team implements several network security groups (NSGs) Planned Changes Contoso plans to implement the following changes:

The network security team implements several network security groups (NSGs) Planned Changes Contoso plans to implement the following changes:

- * Deploy Azure ExpressRoute to the Montreal office.

- * Migrate the virtual machines hosted on Server1 and Server2 to Azure.

- * Synchronize on-premises Active Directory to Azure Active Directory (Azure AD).

* Migrate App1 and App2 to two Azure web apps named WebApp1 and WebApp2.

Technical Requirements

Contoso must meet the following technical requirements:

- * Ensure that WebApp1 can adjust the number of instances automatically based on the load and can scale up to five instances.
- * Ensure that VM3 can establish outbound connections over TCP port 8080 to the applications servers in the Montreal office.
- * Ensure that routing information is exchanged automatically between Azure and the routers in the Montreal office.
- * Enable Azure Multi-Factor Authentication (MFA) for the users in the finance department only.
- * Ensure that webapp2.azurewebsites.net can be accessed by using the name app2.contoso.com.
- * Connect the New York office to VNet1 over the Internet by using an encrypted connection
- * Create a workflow to send an email message when the settings of VM4 are modified.
- * Create a custom Azure role named Role1 that is based on the Reader role
- * Minimize costs whenever possible.

NEW QUESTION: 3

- A. Option C
- B. Option B
- C. Option D
- D. Option A

Answer: A

NEW QUESTION: 4

A customer with Horizon has decided to implement Workspace One for mobile management and Single-Sign On access to Horizon entitlements. The customer plans to use cloud services when possible. A decision is made to use cloud-hosted Workspace One. Which component must be deployed on-premises to support the scenario?

- A. User Environment Manager
- B. Identity Manager
- C. AirWatch Cloud Connector
- D. Identity Manager Connector

Answer: B

Explanation:
