With increasingly higher awareness of the importance of the Red Hat Certified Architect (RHCA) certification, people get to know that a reliable EX362 exam study material is really helpful.

NEW QUESTION: 1You have an Azure subscription named Subscription1. Subscription1 contains a virtual machine named VM1.You install and configure a web server and a DNS server on VM1.VM1 has the effective network security rules shown in the following exhibit.Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.NOTE: Each correct selection is worth one point.**Answer:** Explanation:Explanation:Box 1:Rule2 blocks ports 50-60, which includes port 53, the DNS port. Internet users can reach the Web server, since it uses port 80.Box 2:If Rule2 is removed internet users can reach the DNS server as

well. Note: Rules are processed in priority order, with lower numbers processed before higher numbers, because lower numbers have higher priority. Once traffic matches a rule, processing stops. As a result, any rules that exist with lower priorities (higher numbers) that have the same attributes as rules with higher priorities are not processed. References:
<https://docs.microsoft.com/en-us/azure/virtual-network/security-overview>

NEW QUESTION: 2 You have an on-premises file server named Server1 that runs Windows Server 2016. You have an Azure subscription that contains an Azure file share. You deploy an Azure File Sync Storage Sync Service, and you create a sync group. You need to synchronize files from Server1 to Azure. Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order. **Answer:** Explanation: Explanation Step 1: Install the Azure File Sync agent on Server1. The Azure File Sync agent is a downloadable package that enables Windows Server to be synced with an Azure file share. Step 2: Register Server1. Register Windows Server with Storage Sync Service. Registering your Windows Server with a Storage Sync Service establishes a trust relationship between your server (or cluster) and the Storage Sync Service. Step 3: Add a server endpoint. Create a sync group and a cloud endpoint. A sync group defines the sync topology for a set of files. Endpoints within a sync group are kept in sync with each other. A sync group must contain one cloud endpoint, which represents an Azure file share and one or more server endpoints. A server endpoint represents a path on registered server. References:
<https://docs.microsoft.com/en-us/azure/storage/files/storage-sync-files-deployment-guide>

NEW QUESTION: 3 How long after filing with the Department of Labor are ERISA records required to be maintained? **A.** 6 years **B.** 4 years **C.** 7 years **D.** 8 years **E.** 5 years **Answer: A** Explanation: Explanation: Once a company has filed ERISA records with the Department of Labor, that company is required to maintain those records for a minimum of six years. Answer choices A, B, D, and E are incorrect because they do not reflect accurate federal guidelines for ERISA record keeping.
