NEW QUESTION: 1
An instance is launched into a VPC subnet with the network ACL configured to al low all inbound traffic and deny all outbound traffic. The instance's security group is configured to allow SSH from any IP address and deny all outbound traffic. What changes need to be made to allow SSH access to the instance?
A. Nothing, it can be accessed from any IP address using SSH.
B. Both the outbound security group and outbound network ACL need to be modified to allow outbound traffic.
C. The outbound network ACL needs to be modified to allow outbound traffic.
D. The out bound security group needs to be modified to allow out bound traffic.
Answer: C
Explanation:
http://docs.aws.amazon.com/AmazonVPC/Iatest/UserGuide/VPC_ACLs.

html

NEW QUESTION: 2
You are the Microsoft Lync administrator for a company that uses Lync Online.
The company has mandated that employees may use Lync Online to communicate with contacts from approved
external domains.
You need to configure Lync Online to allow Lync federation with only three specific domains. You must achieve this
goal by using the least amount of administrative effort.
Which two actions should you perform? Each correct answer presents part of the solution.
A. In the Office 365 admin center, add the three domains to the domain list and set the domain intent for each domain
to Lync Online.
B. In the Lync admin center, add the three domains to the Blocked Or Allowed Domains list.
C. In the Lync admin center, set the External Access option to Off completely.
D. In the Lync admin center, set the External Access option to On except for blocked domains.
E. In the Lync admin center, set the External Access option to On only for allowed domains.
F. In the Lync admin center, configure the Presence Privacy Mode option to display presence information only to the
users' contacts.
Answer: B,E
Explanation:
We need to allow Lync federation with only three specific domains to enable Lync communications with those
domains.
In the Lync Online admin center, you can configure options for external communications. You have three options. The
default option is turned off completely; no external communications. To enable external communications, you can
block specific domains but allow all other domains or as in this question, we can allow only specific domains by
selecting the "On only for allowed domains".
With this option selected, we need to list the domains that are allowed. We need to add the three domains to the
Blocked Or Allowed Domains list and select the 'Allowed' option for each domain.

NEW QUESTION: 3
