Answer:

Explanation:

Explanation

Step 1: ..FILEGROUP = N'PRIMARY.

Restore the primary filegroup

Step 2: ..CurrentData

Restore the CurrentDATA filegroup (not the HistoricalDATA).

Step 3: RESTORE ../diff/DB1_diff..

Restore the differential backup

Step 4: RESTORE LOG

Finally restore the log files.

NEW QUESTION: 2

Which statement regarding Oracle Active Data Guard 12c is false?

- A. Any application compatible with a read-only database can run on an Oracle Active Data Guard standby.
- B. It provides new support for DML to global temporary tables and the use of sequences in the standby database.
- C. It supports multi master and bidirectional replication architectures where there are multiple databases that all contain the same data, even if they are not synchronized.
- D. It supports different software patch levels between a primary database and its physical standby database for the purpose of applying and validating Oracle patches in a rolling fashion.
- E. It repairs block corruptions detected in the primary or standby database.

Answer: C

NEW QUESTION: 3

You are developing a Docker/Go using Azure App Service Web App for Containers. You plan to run the container in an App Service on Linux. You identify a Docker container image to use. None of your current resource groups reside in a location that supports Linux. You must minimize the number of resource groups. You need to create the application and perform an initial deployment required.

Which three Azure CLI commands should you use to develop the solution? To answer, move the appropriate commands from the

list of commands to the answer area and arrange them in the correct order.

Answer:

Explanation:

- 1 - az group create
- 2 - az appservice plan create
- 3 - az webapp create

NEW QUESTION: 4

You are designing a new Isilon system to store mobile device video clips. The files average 800MB in size and the application team tells you to plan for up to 15,000 new files per day. The product manager for this new service wants enough capacity for the first year and reminds you that response time for storing and retrieving the files is important for customer satisfaction.

The files will be accessed frequently for the first 48 hours after creation, and then very infrequently after seven days. You plan to use N+2:1 protection, and will configure a SmartPools policy to move inactive files to an archive tier within the cluster.

Which configuration best fits the project requirements?

- A. 4 x X200 nodes with SSD; 36 x NL400 nodes with 4TB drives
- B. 4 x X400 nodes with 1TB drives; 36 x NL400 nodes with 4TB drives
- C. 4 x S200 nodes with SSD; 45 x NL400 nodes with 3TB drives
- D. 38 x X400 nodes with 4TB drives and SSD

Answer: A
