NEW QUESTION: 1

Refer to the exhibit.

A network engineer investigates a recent network failure and notices that one of the interfaces on the switch is still down.

What is causing the line protocol on this interface to be shown as down?

- A. There is a speed mismatch on the interface.
- B. There is a duplex mismatch on the interface.
- C. There is a layer 1 physical issue.
- D. The interface is configured as the target of the SPAN session.
- E. The interface is configured as the source of the SPAN session.

Answer: D

Explanation:

Explanation/Reference:

Explanation:

With the SPAN destination port, the state of the destination port is up/down by design. The interface shows the port in this state in order to make it evident that the port is currently not usable as a production port.

This is the normal operational state for SPAN destinations.
