**NEW QUESTION: 1**

Trisha wants to set up Activity Trends for her Domino environment. Where should Trisha go to configure Activity Trends?

- A. Configuration document
- B. Server document
- C. Program document
- D. Connection document

**Answer: A**

**NEW QUESTION: 2**

Restrictions imposed by a client prohibit the observation of physical inventories, which account for 35% of all assets. Alternative audit procedures cannot be applied, although the auditor was able to examine satisfactory evidence for all other items in the financial statements. The auditor should issue a(an):

- A. Unqualified opinion with an Explanation: in the scope paragraph.
- B. "Except for" qualified opinion.

- C. Unqualified opinion with a separate explanatory paragraph.
- D. Disclaimer of opinion.

**Answer: D**

Explanation:

Explanation/Reference:

Explanation:

Choice "B" is correct. Restrictions of scope imposed on the audit of such a large (35%) asset would require a disclaimer of opinion.

Choices "A" and "C" are incorrect. The asset not audited is too large for a qualified opinion and much too large for an unqualified opinion.

Choice "D" is incorrect. Explanatory language does not get inserted into the scope paragraph, nor is an unqualified opinion appropriate.

**NEW QUESTION: 3**

What is the primary goal of setting up a honeypot?

**Answer: B**

Explanation:

**NEW QUESTION: 4**

What is the primary goal of setting up a honeypot?

- A. To set up a sacrificial lamb on the network
- B. To know when certain types of attacks are in progress and to learn about attack techniques so the network can be fortified.
- C. To lure hackers into attacking unused systems
- D. To entrap and track down possible hackers

**Answer: B**

Explanation:

Explanation/Reference:

The primary purpose of a honeypot is to study the attack methods of an attacker for the purposes of understanding their methods and improving defenses.

"To lure hackers into attacking unused systems" is incorrect. Honeypots can serve as decoys but their primary purpose is to study the behaviors of attackers.

"To entrap and track down possible hackers" is incorrect. There are a host of legal issues around enticement vs entrapment but a good general rule is that entrapment is generally prohibited and evidence gathered in a scenario that could be considered as "entrapping" an attacker would not be admissible in a court of law.

"To set up a sacrificial lamb on the network" is incorrect. While a honeypot is a sort of sacrificial lamb and may attract attacks that might have been directed against production systems, its real purpose is to study the methods of attackers with the goals of better understanding and improving network defenses.
