NEW QUESTION: 1

- A. Option A
- B. Option D
- C. Option B
- D. Option C

Answer: D

NEW QUESTION: 2

Which of the following best describes a scenario to consider when using a distributed IBM Datacap deployment?

- A. When verification requires multiple users to access batches.
- B. When scanning centrally but there is a need to have remote users verify documents.
- C. When user departments are dispersed through large office buildings.
- D. When designing an application that users non-Access databases.

Answer: B

Explanation:

Explanation/Reference:

Explanation:

Distributed deployments are typical in organizations with these requirements:

Scan documents from multiple locations.

Scan centrally but need to have remote users verify the documents.

Use outside vendors to scan or verify images.

Use mobile capture and indexing capabilities.

Have remote multifunction devices and printers that must participate in captures.
