A. cwallet.sso

B. sqlnet.ora
C. keystore.jks
D. tnsnames.ora
E. ojdbc.properties
Answer: D
Explanation:
Explanation
JDBC Thin Connections with an HTTP Proxy
To connect to Autonomous Data Warehouse through an HTTPS proxy, open and update your tnsnames.ora file. Add the HTTP proxy hostname(https_proxy) and port (https_proxy_port) to the connection string.
JDBC Thin client versions earlier than 18.1 do not support connections through HTTP proxy If you need lo use the HTTP proxy to get to your Autonomous Data Warehouse, then you will need to edit the tnsnames.ora file and add the parameters https_proxy and https_proxy_port. This will also require a JDBC Thin Client 18.1 or higher.
https://docs.oracle.com/en/cloud/paas/autonomous-data-warehouse-cloud/user/connect-jdbc-thin-wallet.html#GU

NEW QUESTION: 3
Action type identifies the type of business process associated with an action and determines what happens when you select that action. As part of implementing Fusion HCM, action types are associated with actions.
Which two statements are correct regarding action types?
A. Additional action types can be created.
B. An action type cannot be associated with user defined actions.
C. If "Termination" is an action, "Normal Termination" is an action type.
D. Every action type can have multiple actions within it.
E. Action types are seeded.
Answer: D,E
Explanation:
Note: Action Type
*Action type identifies the type of business process associated with the action and determines what happens when you select an action. An action type is associated with one or more predefined actions. You can create your own actions and associate them with the predefined action types. For example, the Hire an Employee action type is associated with the Hire action. You could create an action Hire Part-Time and associate it with the Hire an Employee action type. Your action appears in the Action list of values on the Hire an Employee page. To hire a part-time employee, you could select the Hire Part-Time action instead of the predefined Hire action.
*Action types are predefined and can contain one or more actions. You may associate your actions with the predefined action types but not create your own action types. (A, not E)

Note 2: Seeded items are items that are provided out of the box.

NEW QUESTION: 4

You are performingzoning operations on a Brocade VDX switch.You want to share your native FC storage with the Brocade VCS fabric.Referring to the exhibit, which two names would you use to create the zone? (Choose two)
A. portsymb name
B. permanent port name
C. fabric port name
D. port name
Answer: B,D
