Juniper JN0-212 test guide materials point test braindumps type and key knowledge out clearly, There are totally three versions of JN0-212 practice materials which are the most suitable versions for you: PDF, Software and APP online versions.

**NEW QUESTION: 1** SIMULATION The network administrator has changed the IP address of ComputerA from 192.168.1.20 to 10.10.10.20 and now Jane, a user, is unable to connect to file shares on ComputerA from ComputerB using the computer name. Instructons: Using the available tools, resolve the connectivity issues. When you have completed the simlaton, please select the done button to submit your answer. **Answer:** Explanation: Need to flush the DNS cache on Computer B:

**NEW QUESTION: 2** Refer to the exhibit. Which address and mask combination represents a summary of the routes learned by EIGRP? **A.** 192.168.25.0 255.255.255.240 **B.** 192.168.25.16 255.255.255.252 **C.** 192.168.25.16 255.255.255.240 **D.** 192.168.25.28 255.255.255.252 **E.** 192.168.25.28 255.255.255.240 **F.** 192.168.25.0 255.255.255.252 **Answer: C** Explanation: The binary version of 20 is 10100. The binary version of 16 is 10000. The binary version of 24 is 11000. The binary version of 28 is 11100. The subnet mask is /28. The mask is 255.255.255.240. Note: From the output above, EIGRP learned 4 routes and we need to find out the summary of them: + 192.168.25.16 + 192.168.25.20 + 192.168.25.24 + 192.168.25.28 &gt; The increment should be 8. 28 - 16 = 12 but 12

is not an exponentiation of 2 so we must choose 16 (24).  
Therefore the subnet mask is /28 (=1111 1111.1111 1111.1111  
1111.11110000) =255.255.255.240 So the best answer should be  
192.168.25.16 255.255.255.240

**NEW QUESTION: 3** A. Option CB. Option DC. Option BD. Option EE.  
Option FF. Option GG. Option A **Answer: A, B** Explanation:-  
Scenario: The current nightly backups have been failing due to  
insufficient space on the available drives and manual drive  
cleanup often needing to happen to get past the errors.  
Additional space will not be made available for backups on the  
HQ or satellite servers.- Need to store files in the cloud.-  
Manage your backups to Windows Azure: Using the same methods  
used to backup to DISK and TAPE, you can now back up to Windows  
Azure storage by Specifying URL as the backup destination. You  
can use this feature to manually backup or configure your own  
backup strategy like you would for a local storage or other  
off-site options. This feature is also referred to as SQL Server  
Backup to URL. SQL Server Managed Backup to Windows Azure

**NEW QUESTION: 4** Which of the following OS utilities can be used  
to modify which programs are run at the time of system startup?  
A. Services B. MSCONFIG C. MSTSC D. Computer Management **Answer: B**
