NEW QUESTION: 2Your company is planning to migrate to Microsoft Exchange Online. The company employs 1,000 people, each with a mailbox currently located on Exchange 2010 on-premises. You estimate that it will take a minimum of four weeks to migrate all mailboxes from on-premises Exchange to Exchange Online.The company has the following migration requirements:During the migration, do not change the existing Microsoft Outlook profiles and .ost files used by the employees.Ensure that email messages sent between on-premises mailboxes and online mailboxes during the migration are secure.Do not send email messages between on-premises mailboxes and online mailboxes over the Internet in plain text.You need to select the migration strategy that meets the requirements.Which migration strategy should you use?**A.** Staged migration followed by remote move migration**B.** Staged migration only**C.** Hybrid migration only **D.** IMAP migration followed by staged migration**Answer: C**
Explanation:You can use a hybrid migration to migration from Exchange 2010 to Exchange Online.**Note:** In the Deployment Assistant, a hybrid deployment is when you create a new Exchange Online Exchange organization in Microsoft Office 365 for enterprises and then connect it to your existing on-premises Exchange 2010 organization by configuring Active Directory synchronization and using the Hybrid Configuration wizards.

NEW QUESTION: 3A user is no longer able to browse the Internet after returning from vacation. The user is able to log in and navigate to the local intranet, but not to any outside sites. A technician pings a well-known website by name but gets no reply. The technician then pings its IP address and gets a reply. Which of the following commands will MOST likely resolve the issue?**A.** ipconfig /setclassid**B.** ipconfig /flushdns**C.** ipconfig /released**D.** ipconfig /all**Answer: B**

NEW QUESTION: 4**HOTSPOT**Your company network has two branch offices. Some employees work remotely, including at public locations. You manage an Azure environment that includes several virtual networks.All users require access to the virtual networks.In the table below, identify which secure cross-premise connectivity option is needed for each type of

user. Make only one selection in each column.**Answer :**
Explanation:Explanation:* A site-to-site VPN allows you to create a secure connection between your on-premises site and your virtual network.* A point-to-site VPN also allows you to create a secure connection to your virtual network.In a point-to-site configuration, the connection is configured individually on each client computer that you want to connect to the virtual network.* Use a point-to-site configuration when:You want connect to your virtual network from a remote location. For example, connecting from a coffee shop.You have a site-to-site connection, but have some clients that need to connect from a remote location.
