NEW QUESTION: 3
You have a fact table named FactSales that is 100 GB. FactSales
is in a data warehouse that is partitioned by month.
You discover that queries perform index scan operations when
the queries should perform index seek operations.
You need to optimize the query plan to reduce the number of
scans.
How should you complete the statement? To answer, drag the
appropriate values to the correct targets. Each value may be
used once, more than once, or not at all. You may need to drag
the split bar between panes or scroll to view content.

Answer:
